

U.S. Patent Application No. 09/488,762  
Amendment dated April 2, 2004  
Reply to final Office Action dated December 2, 2003

**AMENDMENTS TO THE CLAIMS:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**LISTING OF CLAIMS:**

Claim 1 (currently amended): A medical adhesive tape ~~or sheet for attaching~~ for adhering onto a skin surface comprising a supporting substrate and an adhesive layer directly or indirectly laminated thereon, wherein said supporting substrate comprises a composition which comprises 100 parts by weight of a thermoplastic resin ~~and 10 to 200 parts by weight of a thermoplastic resin~~ and 10 to 200 parts by weight of a silicic acid compound, ~~and wherein said medical adhesive tape or sheet is attachable~~ is adhereable to a skin surface, and wherein said supporting substrate has a stress relaxation ratio of 60% or less.

Claim 2 (currently amended): The medical adhesive tape ~~or sheet~~ as claimed in claim 1, wherein said silicic acid compound is at least one selected from the group consisting of zeolite, talc and silica.

Claim 3 (currently amended): The medical adhesive tape ~~or sheet~~ as claimed in claim 1, wherein said thermoplastic resin is at least one member selected from the group consisting of a polypropylene resin, a blend of a polypropylene resin and an elastomer, and a copolymer of a polypropylene resin and an elastomer.

Claim 4 (currently amended): The medical adhesive tape ~~or sheet~~ as claimed in claim 3, wherein the polypropylene resin, or the copolymer of a polypropylene resin and an elastomer is amorphous or low crystalline.

Claim 5 (currently amended): The medical adhesive tape ~~or sheet~~ as claimed in claim 4,

U.S. Patent Application No. 09/488,762  
Amendment dated April 2, 2004  
Reply to final Office Action dated December 2, 2003

wherein the amorphous or low crystalline polyolefin resin is present in an amount of 30 to 100% by weight based on the total weight of film-forming materials for a supporting substrate.

Claim 6 (currently amended): The medical adhesive tape ~~or sheet~~ as claimed in claim 1, wherein said supporting substrate further comprises a resin modifier.

Claim 7 (currently amended): The medical adhesive tape ~~or sheet~~ as claimed in claim 6, wherein the resin modifier is present in an amount of 0.1 to 40% by weight based on the total weight of the film-forming resin composition.

Claim 8 (currently amended): The medical adhesive tape ~~or sheet~~ as claimed in claim 6, wherein said resin modifier is at least one selected from the group consisting of a hydrogenated product of styrene-butadiene copolymer or its maleic acid-modified product, polystyrene-polyethylene butylene-crystalline polyolefin, crystalline polyolefin-polyethylene butylene-crystalline polyolefin, ethylene-ethyl acrylate copolymer, ethylene-acrylic acid ester-maleic anhydride copolymer, ethylene-methacrylic acid glycidyl ester copolymer, maleic anhydride graft polypropylene, maleic anhydride graft ethylene-polypropylene copolymer, acrylic acid graft polypropylene, ethylene-vinyl acetate copolymer, ethylene-vinyl acetate/ethylene-propylene-diene/polyolefin graft copolymer, metal salts of ethylene-methacrylic acid copolymer and chlorinated paraffin.

Claim 9 (canceled)

Claim 10 (currently amended): A first-aid adhesive tape comprising the medical adhesive tape ~~or sheet~~ as claimed in claim 1, and an absorbent pad provided at a central region on a surface of the adhesive layer thereof.
